DeVilbiss[®]
HEALTHCARE

The Hb0-2000 fingertip pulse oximeter is compact, durable and lightweight in design. This stylish little device incorporates a state of the art OLED screen display and has been designed for daily non-invasive screening for patient SpO₂ and pulse rate detection. The Hb0-2000 is ready to use and comes complete with lanyard, batteries and instruction manual.

Oximeter Display Functions

Six Directional Display Modes:

Product Features

The Hb0-2000 features an optional six directional display mode for operator convenience and user defined parameter settings for both SpO₂ and pulse rate criteria indicating visual alerts for high and low values.

Screen Display

SpO₂, pulse rate and pulse rate bar, plethysmograph waveform and battery status indicator.
